

Achieving Better Patient Outcomes: Diagnosis and Management of Periodontal Diseases with Advanced Hands on Instrumentation

BANDLISH & AUPLISH

Course Overview

This practical and interactive course delivered by Consultant in Periodontology Gita Auplish and experienced Hygienist & Therapist Kirstie Thwaites aims to provide delegates with an update in the current concepts in periodontal diagnosis and treatment planning, including identifying patient risk factors and interpreting radiographs. The important issues surrounding communicating effectively and recording contemporaneous records for the periodontal patient will be addressed. In addition to this, the practical hands-on session will enable delegates to learn advanced instrumentation techniques using site specific Gracey curettes.

Gita Auplish

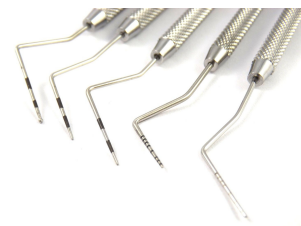

BDS (Hons), MSc (Dist), MFDS RCS (Eng)

Gita works as a Consultant in Periodontology at Kings College Hospital, London where she is involved in clinical teaching and lecturing at postgraduate level. She was at the Eastman Dental Hospital prior to this for 14 years. Gita also works part time in her private practice on Harley Street treating patients referred for periodontal disease and implant placement. If her face looks familiar it may be because she has been the resident TV dentist on ITV1 Daybreak and is regularly featured live on the sofa and presenting positive dental health messages to the nation!

Kirstie Thwaites

Dip Dent Hygiene, Dip Dent Therapy PG Cert MaCE

Kirstie qualified in 2006 from the University of Leeds as a Dental Hygienist & Therapist. In 2013 she completed a two-year postgraduate course in Enhanced Clinical Periodontology at Kings College Hospital. She currently works in specialist private practice and as a Lecturer in Oral Health Sciences at the University of Essex where she teaches dental hygiene & dental therapy and on the dental hygienist adaptation module for overseas hygienists or those returning to work.
